

OUR SCHOOL MOTTO IS:

Growing in Faith and Knowledge

OUR SCHOOL MISSION STATEMENT

St Joseph's Preparatory School is a Catholic School, which was founded by the Christian Brothers and is a place where the staff and governors work to bring the Gospel values into all areas of School life and where prayer, worship and liturgy are seen as meaningful experiences.

Each child is encouraged to strive for the highest possible standards of work and behaviour, whilst learning to live as a well-mannered, self-disciplined and tolerant individual both inside and outside the classroom. The children learn to live as happy and caring members of a School community, which values their unique individual talents, and also the needs of others.

St Joseph's Preparatory School values and nurtures a close partnership with parents and encourages the forming of meaningful links with the wider community. The children are encouraged to take part in extra curricular activities in order to develop an interest in sporting, cultural and recreational activities.

St Joseph's Preparatory School recognises its legal duty to work with Local Safeguarding Children's Board acting on behalf of children in need or enquiring into allegations of abuse.

We recognise that pupils have a fundamental right to be protected from harm and require a secure environment in order to learn effectively.

St. Joseph's Preparatory School's Safeguarding Children Policy follows the guidelines laid down by the City of Stoke on Trent Safeguarding Children's Procedures and "Working Together to Safeguard Children".

Our motto 'Growing in Faith and Knowledge' encapsulates the School's Aims:

- To provide a caring, Christian community, in which individuals can develop fully.
- To strive for excellence in all areas – academic, sporting, musical etc.
- To provide an ethos which brings the Gospel message alive.
- To develop strong community links.
- St. Joseph's Preparatory School has achieved International School Status and is an Eco School.
- We are a Dyslexia Friendly School.
-

St Joseph's Preparatory School is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share this commitment.

Governors are kept informed through the Curriculum sub Committee.

Drugs Policy

Co-ordinator: Mrs S Hutchinson
This Policy was drafted: October 2010
Updated September 2011

St Joseph's Preparatory School
Stoke on Trent

Drugs Policy

Rationale

Reference to 'drugs' is an emotive issue. Society as a whole is anxious about the effects of drug misuse and yet does not always clarify its understanding of the issues. Different groups in society have different perceptions of the dangers and acceptability of different drug types. In some circles drugs can be glamourised and the subject open to misunderstandings. Drugs education in primary schools can cause alarm and yet is essential if we are to equip our children with the necessary skills, understanding and knowledge to move confidently into adult life.

We have a responsibility to inform our children of the facts relating to the substances they will and do encounter in their environment. In many cases they will have already experienced the effect of drugs in the adults around them. It is important that we are sensitive to the experiences that children may have.

We will not tolerate the misuse of drugs within the schools and its grounds. This includes adults who come on to the school premises and may be intoxicated or in possession of illegal drugs. Our school is a no-smoking area and we request all adults to refrain from smoking around the premises. This has also been extended to after-school events.

We recognise that some of our children and parents need a variety of medicines and appropriate arrangements are made to enable the correct distribution of these. Further information can be found in our Health and Safety Policy.

This drugs policy is part of our overall approach to health and well-being. Through our PSHSE Curriculum and through circle time and our school ethos we aim to ensure that children recognise the importance of what they chose to eat and drink and the effect which this can have. Self-respect and a healthy lifestyle are all part of an approach which will enable our children to make the right choices for themselves and their families now and in the future.

Governors are kept informed through the Curriculum sub Committee.

Definition of ‘Drugs’ for the benefit of this Policy

The term refers to:

- All illegal drugs
- All legal drugs, including alcohol, tobacco, volatile substances
- All over the counter and prescription medicines

AIMS

- To provide the information and support for children to be able to make lifestyle choices
- To encourage a supportive ethos in which issues can be discussed and questions answered
- Ensure the safety of staff and pupils when on the school site

Drugs Policy

- Provide appropriate role models and examples to illustrate a healthy lifestyle
- Take a firm stance against illegal drugs
- Raise awareness for children of the importance of their choices in forging a healthy lifestyle.
- Recognise the valuable role that medication can have
- Acknowledge that not all family members may make healthy choices and some of the reasons why
- Enable children to develop a self-awareness and realise the power they have to determine their own lives
- Provide a whole school approach to issues of healthy life style
- Draw attention to the effect which peers can have upon the decisions that we make and the need to take a considered approach to this
- Alert children to ways of seeking additional help and support where necessary
- Ensure that children have access to balanced information and views against which they can clarify their own opinions to help children establish the difference between fact, opinion and belief

The Drugs Education Curriculum

Statutory Guidance: Science

Key Stage 1

Sc2 2d about the role of medicines

Key Stage 2

Sc2 2g about the effects on the human body of tobacco, alcohol and other drugs, and how these relate to their personal health

Non-statutory guidance: PSHE and Citizenship

Key Stage 1

3f that all household products, including medicines, can be harmful if not used properly

Governors are kept informed through the Curriculum sub Committee.

This document has been written with reference to “Drugs: Guidance to Schools”

Key Stage 2

3d which commonly available substances and drugs are legal and illegal, their effects and risks

The approach at our school

There are a number of ways in which we aim to help children understand the implication of drug use and misuse. We recognise that drugs impinge on many of our children's lives in a variety of ways and the subject needs careful handling. We are also aware of the impact of national initiatives and publicity campaigns. We aim to involve different deliverers in providing different perspectives on the issue and to provide opportunity for children to ask questions and share their existing knowledge. There may be many misconceptions which will need to be addressed in a sensitive and factual way. Where teachers are unsure it is acceptable to refrain from answering the question until further clarification can be sought. The methods we use include:

Circle Time

These informal opportunities are taken to enable children to discuss topical issues as they arise in the media, at home and in the locality. The teacher facilitates the discussion, handles any remarks leading to possible disclosures and establishes ground rules.

Circle time provides a particularly good opportunity to discuss issues raised through discussion during PSHCE and in the more formal Science curriculum. On occasions issues will also have been raised through literature that the children have been reading.

PHSCE

During our weekly KS2 circle-time aspects are discussed relating to:

- Safety in the handling of household products and medicine
- The effect of smoking and drinking upon our lives and those around us
- The category of 'illegal drugs' and what children understand and know about these
- Building ourselves a healthy lifestyle – looking to the future

School Nurse

Our school nurse is a recognised, familiar figure in our school. Although on hand to support individual cases and families she also helps to deliver aspects of our drugs education by providing some medical information about the effect and use of medicines within our society.

Using Fiction

At different times picture books may be used as a resource to help support the PSHCE curriculum and to open up discussion in the nurture group. Using stories enables discussion about issues which can be quite sensitive without appearing to target any individual.

Governors are kept informed through the Curriculum sub Committee.
This document has been written with reference to "Drugs: Guidance to Schools"

Science

As part of our KS2 science curriculum we include:

- The role of medicines in our lives
- The effects of alcohol and tobacco on our health
- The effects and risks of illegal drugs on health, family and future
- What we mean by a healthy lifestyle and the effect which different food, drink and drugs can have upon us both emotionally and physically

PHSCE Week

PHSCE Week provides an additional opportunity to highlight issues relating to drugs. As the normal timetable is suspended individual classes further their understanding through research, independent enquiry and a variety of visits and visitors. This helps to support both the factual basis of their knowledge as well as the recognition of these issues as relevant to all society.

In the Event of Disclosure

There may be times during discussions about drugs when children make disclosures. Where this is the case the teacher should sensitively listen to what the child has to say whilst also avoiding further disclosure in front of the class. At the end of the lesson it might be appropriate to spend some time with the child allowing them opportunity to speak but following the child protection policy, not asking questions or writing down at this stage. Confidentiality cannot be promised. As soon as is reasonable, the class teacher should pass on their own concerns to the designated person who will follow the agreed procedure for disclosure handling. The class teacher should always ensure they remain calm and should not appear shocked by what children might have to say. It is important that children understand the ground rules during any discussion and that they do not put pressure upon one another to reveal personal information.

Drug use on the Premises

Our school makes it clear that drug use on the premises is not acceptable except in the case of prescribed medication which is known to senior management. This includes:

- Smoking on or around the school premises either during the school day or during evening events
- Alcohol on the school site during the school day
- Alcohol consumed by adults in the playground
- Adults on the school premises who are evidently under the influence of alcohol or substances which impair their judgment
- Adults in known possession of alcohol or illegal substances around the school premises

Governors are kept informed through the Curriculum sub Committee.
This document has been written with reference to “Drugs: Guidance to Schools”

Where school staff suspects that there is transgression of these guidelines senior management should be informed immediately at which point a judgment will be made as to whether they should:

- approach the individual
- call the police
- make arrangements to isolate the individual to ensure the safety of children on the school site

At all times the safety of the children remains the key factor in any decision made whilst staff should also be alert to the danger they may bring on themselves by certain courses of action.

Any repeat of transgressions might be referred to the Police in order for legal action to be taken.

If there is concern that parents collecting a child may potentially place that child at risk the school can, in extreme circumstances, refuse to hand over the pupil. The appropriate services would then be notified immediately.

Drug use by Pupils

It is very rare for primary school pupils to be identified as taking non-medicinal drugs. However, on occasions it might come to the attention of staff that children have been smoking or drinking or taking drugs or be in the company, on occasions of adolescents who are. Each case should be taken individually and the appropriate course of action decided by a senior member of staff. Alternatives include:

- Use of the school behaviour policy
- Referral to parents
- Referral to the Police
- Referral to social services
- Referral to another external support agency
- Counselling and support for individual children

A combination of the above might be used. Decisions will be based upon the immediate and long term safety of the child involved and the nature and time of the incidents.

Parental involvement in any discussion is crucial except where the incident is one considered to relate to child protection. In this case Child Protection policy should be followed and an immediate referral made.

Drugs found on School Premises

Needle/Sharps

These will be removed by members of staff using thick gloves and placed in a sharps box.

Governors are kept informed through the Curriculum sub Committee.
This document has been written with reference to “Drugs: Guidance to Schools”

Alcohol/Tobacco

Parents will normally be informed and given the opportunity to collect the alcohol and tobacco.

Illegal drugs

Temporary possession of these should be removed in the presence of another adult. The drug should be sealed in a plastic bag with details of the time and date found and kept in a locked cabinet. The Police should then be notified.

Special Needs

It is appropriate that all children have access to the information covered in our Drugs Education Programme. Arrangements should be made within classrooms to enable this to happen either through additional TA support or adaptation of curriculum materials. In most cases the largely discursive nature of the subject will mean that all children have equal access.

It should be noted that some children will need to use medication regularly as part of their own special need. Care should be taken at all times to draw a distinction between different types of drugs use and enable children to see the value that medicinal drugs can have in our society. There may be opportunity for individuals with first-hand experience of taking medication to share their experiences and discuss the benefits. Any such involvement should be discussed with the child and his/her parent beforehand.

Parental Involvement

Parents are invited to inspect the school's drug policy. If parents have concerns they should be invited into school to share these and to see any materials that are being used. The School Nurse will discuss with parents any issues relating to drugs as and when the need arises.

Assessment

It is useful to incorporate a before and after assessment of children's understanding of drugs and their uses.

For example an initial lesson might request children to draw examples of different drugs. This can provide a basis upon which to discuss what children perceive as a drug. At the end of the unit a similar activity will hopefully demonstrate conceptual development. Where particular issues remain this should be noted and planned for another session.

Assessment for learning is an integral part of our teaching. Children should be asked to share their level of understanding, the most effective teaching techniques and what they believe will help them further as units of work progress. In some cases group work will enable children to support one another.

The elements of drug education that form part of the science curriculum will be assessed in accordance with the requirements of the National Curriculum.

Governors are kept informed through the Curriculum sub Committee.
This document has been written with reference to "Drugs: Guidance to Schools"

Monitoring

Senior Management will monitor the progress of planning and feed forward. Work trawls and observations provide insight into the children's understanding and the quality of delivery. Discussion with the school council provides additional anecdotal information.

The PSHCE and Science Co-ordinators receive information through:

- Work trawls and observations
- Subject meetings
- Staff meetings

Governors are kept informed through the Curriculum sub Committee.
